

Coin Sorter

SCAN COIN SORTOREX

YOUR WORLD COUNTS

The SCAN COIN SORTOREX has been developed to speed up your coin processing. It sorts up to 3,500 coins per minute in two currencies in up to 17 denominations. This real heavy-duty machine is the perfect option for customers handling large quantities of coins.

- ▶ For high cash volumes
- ▶ Highest accuracy in counting, sorting and batching
- ▶ Fast-change sorting track
- ▶ Exceptionally accurate for off-sorting counterfeit, foreign and damaged coins

Speed Up Your Coin Processing

Do you need to speed up your coin processing while keeping it accurate? This machine is a real heavy-duty coin sorter for mixed batches of coins. The coin sorter gives you the freedom of counting and sorting several different currencies at the same time. The coin sorter includes a unique electronic counting sensor technology. The machine can count up to 3,500 coins per minute in two currencies and up to 17 denominations.

Accuracy in action

Apart from being a fast worker, the SCAN COIN SORTOREX is renowned for having the highest possible accuracy in counting, sorting and batching. It is also exceptionally accurate for off-sorting counterfeit, foreign and damaged coins.

Quickrail®

Like any other coin sorter, the SCAN COIN SORTOREX is equipped with Quickrail® – a fast-change sorting track. It can be changed in next to no time and minimum maintenance is required.

Easy operation

The machine is easily operated from a clear and logical display – designed to perfectly suit the needs of the operator. It has a large coin tray with high capacity. An automatic coin feed and a cover reducing noise and dust are other examples of classic ergonomics.

Desktop efficiency

The SCAN COIN SORTOREX has been designed for desktop use. There is no need for space-consuming stands or special furniture. Just place it where it suits you best and from day one the SCAN COIN SORTOREX is a convenient working partner.

Multi-Stop Capacity

The sorter features multi-stop capacity, meaning that several denominations can be packed into bags or tubes in one step, eliminating unnecessary stops for packing after the coins has been sorted. The amount of each batch can be defined and pre-programmed to meet the needs of all users.

The solution could also be equipped with a wide range of Coin lifts for feeding the coins into the sorter in a continuous and efficient way.

Specification

Width	1,232 mm / 48.5"
Depth	468 mm / 18.4", 512 mm/20.2" incl. outlets
Height	334 mm / 13.1"
Weight	76.5 kg / 168.6 lbs
Voltage	230 V/50 Hz, 115 V/60 Hz
Power	approx. 300 VA
Speed	up to 3,500 coins /min.
